## LEATHER DESCRIPTION

### Properties and finish:

Aurula combines the finesses of an oily/waxy finishing with the rugged, authentic character of the Buffalo skin. The skins are mainly dyed with chromium, giving the leather a smooth and soft touch. The article is processed with aniline dyes so that there no skin characteristics are covered. The greasy leathery touch is created by a finishing with different types of refined mineral oil. The buffalo structure clearly visible and so adding to the leather an extra dimension. The beauty of this leather is in the deep color shading, and the nice smooth feel. The skins used for the Aurula leathers are from the best selections.

### Maintenance:

Aniline dyes make leather feel soft and warm. Due to the open structure of the leather, it is sensitive to stains. Light scratches can be removed by hand or with a soft, fluffy cleaning cloth. Avoid direct sunlight on your furniture as much as possible and do not place your furniture near a heat source. Discolouration of leather is excluded from the guarantee. Avoid damage by sharp objects such as buckles, studs of jeans, heels, animal nails, etc. These damages are excluded from the guarantee. In the event of moisture spillage, we recommend gently dabbing the leather with an absorbent cloth and allowing it to dry. Do not rub. After drying, it is best to treat the leather with a special leather cleaner. Never use care products and/or polishes that are not specifically intended for this leather. In addition to these instructions, it is advisable to apply a leather protector to the Aurula leather every 6 months, so that the leather gets a certain protection layer.

We recommend the following products:

- Leather care set VI Keralux 3 products
- Brushed leather Care kit 2 x 500 Oranje

# Maintenance set

BRUSHED LEATHER CARE KIT

## PRODUCT INFO

### Description

The Brushed Leather Care Kit contains various products for maintenance, cleaning and protection of sanded leathers.

### Instructions for use

**Spray Leather Protector 500 ml:** The surface must be colourfast. Test first on an inconspicuous area.

If the colour comes off, do not treat. Hold the spray can upright and spray approx. 20 - 30 cm distance in even layers.

Drying time approx. 12 hours. The content of the can is sufficient for approx. 5 - 6 m<sup>2</sup>. Avoid overdosing. Treat your leather

Leather Protector every 6 months. Use only in well-ventilated areas!

**Vintage Lotion 500 ml:** Test for colour fastness and resistance in an inconspicuous place before use. Only compare after drying.

Spray Leather Vintage Lotion onto a clean, lint-free white cloth or flannel. Use it to clean the leather with a flat hand in light,

circular movements. Always take a clean part of the cloth. Avoid rubbing too hard. rubbing. If desired, after drying rub the

leather lightly with a soft brush or dry white terry cloth. **Sponge:** Gently brush until dirt has disappeared and/or

the "velvet" appearance has been restored. If necessary, treat with Leather Protector for leather.

## Additional information

### Aftertreatment

Treat in time with one of the products from the set.

### Composition

The spray can contains fluorocarbon, Natural Leather Cleaner contains various surfactants.

### Storage

Store in a dry and cool place in tightly closed packaging.

### The care set includes

**Spray Leather Protector:** Protects against dirt and stains based on water, grease and oil.

**Vintage Lotion:** Cleans and offers extra protection.

**Sponge:** The sponge is used for light, superficial soiling and to maintain/restore

the "velvet" appearance of roughened leather and suede.

### General advice

Impregnate new leather immediately with Leather Protector spray. First brush the existing leather with the sponge in circular

with the sponge and then treat with Leather Protector aerosol. Vacuum the leather weekly with the (often) enclosed

hoover brush! Also treat the leather with the nubuck sponge at least once a month.

LEATHER CARE SET VI KERALUX

## PRODUCT INFO

### Instructions for use

Impregnation and UV filter are important from day 1. We advise to dust this type of leather immediately on delivery and to treat it with the Keralux® impregnation spray N. Follow the instructions for use on the packaging.

It may be useful to order a separate Keralux® impregnation spray N for new furniture.

Then there is still sufficient spray for the next treatment after six months. Weekly dusting with a dry lint-free cloth or the LCK® cleaning glove. (If necessary, with a few drops of LCK® cleaning water).

Maintenance with this set (clean, feed and protect) at least twice a year.
